

DCF-UN-200/220/250-22

Beam Delivery Fiber

With triple-clad construction, this passive fiber allows efficient power transfer and helps reduce losses and thermal accumulation. As it matches industry-standard active fibers, this multi-mode fiber offers excellent compatibility with high-power fiber laser modules for laser beam delivery applications.

Features & Benefits

- Compatible with industry standards
- Low background losses
- Excellent geometrical properties

Applications

- Fiber laser beam delivery

Specifications

Optical

Numerical Aperture - Core	0.22 ± 0.02
Numerical Aperture - Cladding	> 0.45
Background Loss @ 1200 nm (dB/m)	< 10

Geometrical & Mechanical

Core Diameter (µm)	200 ± 5
Cladding Diameter (µm)	250 ± 5
Core/Cladding Concentricity Error (µm)	> 3
Coating Diameter (µm)	375 ± 20
Proof Test (kpsi)	≥ 100

Environmental

Operating Humidity (%)	5 - 85
Operating Temperature (C°)	0 - 70
Storage Humidity (%)	5 - 85
Storage Temperature (C°)	-40 - 85

ISO 9001:2015 certified quality system | RoHS and REACH compliant.
